

## Her Life and Deaths

The people and places in the novel *Her Life and Deaths* are fictional. June was born in 1933 and her story begins as she is nearing the end of her life. As her mental health deteriorates, she is moved into a nursing home for people with dementia. June describes the highs and lows of institutional life, and the feelings of fear and isolation as her fate is taken out of her own hands. The story of her childhood and adulthood is told in detail and it becomes clear that she was responsible for several deaths. June's life was idyllic, with loving parents and with her lifelong friend, Giles, by her side. However, June suffers through a violent marriage. After a few months, she conveniently becomes a widow. June lives alone in the cottage where she was born, describing her friendships and a career plagued by bad relationships with male colleagues. In her old age, she prefers the serenity of trees to the company of others. Near the end of her life, she makes a macabre discovery and attempts to right a terrible wrong. After June's death, a distant cousin comes to live in June's house, where she hears June's voice calling to her. Will the new tenant follow the same path as June?
